WHAT Part 2
What Will be Done in Year One

8 Big Ideas
The original vision for the OneComm Plan was to identify “10 Big Ideas to transform the economy of South St. Petersburg.” By the 10th month of the planning year, community leaders had nominated 19 Big Ideas.

Following deliberations among planning leaders combined feedback from idea authors and survey responses from the community, the OneComm Plan team will lead the development of 8 Big Ideas during year one of implementation while lending support to 11 of the Big Ideas.

The demarcation of “OneComm-led” versus “OneComm-supported” was partly decided by the authorship of the Big Ideas. Several of the concepts are being spearheaded by separate but aligned organizations. As examples, the Smart Hub at Skyway is being developed by Florida Housing Coalition, and the One Community Grocery Co-op has operated independent of the OneComm Plan process for over a year (the co-op derived its name from the suggestion of Bro John Muhammad as a way of fostering a united voice for the venture).

The whittling down to 8 Big Ideas is still a decision in flux. Four of the Big Ideas that are technically led by other organizations will remain temporarily under OneComm leadership (bringing the short-term total to 12).

The following pages provide tabular snapshots of the 19 Big Ideas, their status, and a demarcation of which ideas will be led by the OneComm team.
Shared Implementation Support & Status of 19 Big Ideas
